Figure 7: View from the prominent Bear Hill bedrock ledge of the Bear Hill Nature Preserve that runs through Bear Hill Pt. 1 (red pentagon & Fig. 2) and Bear Hill Pt. 2 (yellow triangle & Fig. 3) for some 250 feet. The light blue coloration indicates land area that is visible from the Bear Hill ledge. Buildings and cleared areas of the proposed Hermitage site that fall within the blue area would be visible from the Bear Hill Nature Preserve ledge.
